

We're building a Park in Nesconset

...to Remember the Responders!

The '9/11 Responders Remembered' Committee is made up of those who Responded on Sept. 11th. as well as the 9/11 Community. Our goal is to raise the necessary funds needed to build a Park in Nesconset that will be designed around a Remembrance Wall where we will list all of our deceased brethren who have died from illnesses they received while serving heroically at Ground Zero.

Tragically, as of the printing day of this Poster there have been 996 Heroes who have died from the many different and rare diseases received by breathing in 1,000's of deadly toxins, and the list is growing.
